Ready-to-use tool to manage  
prices and availability for direct  
contracts with hotels

## Introducing Hotel Extranet

Extranet enables hoteliers to manage and distribute their property information, room inventory, rates and availability to various online travel agencies (OTAs), booking websites and other distribution channels.

**By purchasing a license and becoming owner** of your own Hotel Extranet you get:

- **Powerful availability and price management tool** for direct hotel contracts
- **Unique, technically complicated features** that give a competitive advantage over other booking services
- **Technical and maintenance support** services for your in-house team

Choose the appropriate options based on your business requirements.

# Key Features for Platform Owners

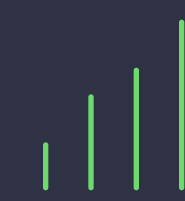

## Hotel management

- No limit on the number of connected hotels
- Full visibility of a hotel's performance
- Simple management of hotel statuses

## Flexible contract management

- Create multiple contracts for each hotel
- Manage contract settings individually: commission, payment model, etc
- Auto-prolongation for contracts

## Finance tracking and reports

- Track and manage payments to hoteliers
- Transparent reports by paid / not paid bookings
- Reports by hotel

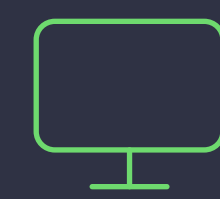

## User and roles management

- Flexible user management system
- Different roles and functions support

## Audit trail for content changes

- Easily track content changes made by hoteliers
- Accept or reject content changes

## Booking management and amendments

- A system administrator can change any aspect of a booking made: dates, cost, daily prices, etc.
- Cost calculation details

# Base Features for your direct Hotels

## Tariffs

Fully customizable tariffs for any scenario

- Special prices for custom board types
- Different prices for mobile and desktop users
- Early-bird pricing

with the ecosystem

- Hotel Extranet system is already integrated with Hotel Booking Engine
- Existing integration with Content Management System for easy data migration
- Higher priority ranking for Extranet rates on XML API and B2C website

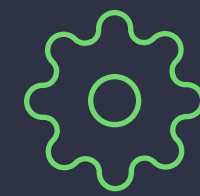

# How we can help you achieve your business goals

## Integration

In addition to licensing the Hotel Extranet system, we offer seamless integration with your existing infrastructure, ensuring that our product is perfectly aligned with your unique business requirements.

## Customization

Full customization of the system is available, from aligning visual styles to translating to any language.

## Evolution

The team has extensive experience in the travel industry and can help you develop your solution and add new features.

## Support

WaveAccess can provide full technical support for the solution by providing a dedicated team with experienced resources.

## Frequently Asked Questions

- **Q: How many hotels can be accommodated in Extranet without affecting system performance?**
- **A:** We have real cases when up to 20,000 hotels have contracted and connected to one extranet system without any performance problems. The final performance of the system depends on your equipment. We will provide you with recommendations on the optimal configuration of your servers.
- **Q: Can Hotel Extranet be integrated with Channel Manager X?**
- **A:** The system architecture is fully ready to integrate with CMs. We have experience of integration with more than 15 CMs for our customers
- **Q: Can the design / layout / color scheme be changed to align with my style guidelines?**
- **A:** We offer the extranet system with basic styles but we can customize the design to your requirements
